Personality Test

1. Put your dog on its back. If he doesn't resist or if he stays, he is submissive, if he stands right back up, he's dominant.
2. Put a bowl of food in front of your dog. Slowly take it away from him. If he tries to bite you, that means he is very protective of his belongings.
3. Leave him alone in a room he has never been to before. If you hear whining, he is probably very attached to people and may have separation anxiety.
4. Play tug-of-war with him. Observe if he growls and/or remains persistent. If he growls, he is going to be a bit feisty. If he is persistent, he is a very determined pup, and is confident, resulting that he may be dominant (see #1).

If you are up to the challenge, go ahead and choose a feisty pup.

If you are a first time dog owner, choose a mellow puppy for your new addition.
